ACCEL® Access 3-Piece Introducer

B. Braun Interventional Systems Inc. is excited to announce the availability of our new **ACCEL® Access 3-Piece Introducer System, with TrueGlide™ Hydrophilic Coating**. The ACCEL® Access 3-Piece Introducer is for percutaneous introduction and placement of catheters and guidewires and is approved for vascular and nonvascular applications. It consists of an inner stiffening stylet, dilator, and sheath. The stiffening stylet and dilator assembly accepts an 0.018" guidewire. The secure, 3-piece, luer locking assembly enhances device stability and targeted access. The entire length of the introducer sheath is radiopaque and contains a radiopaque (RO) marker band at the distal tip for enhanced visibility under fluoroscopy. The sheath tip inner diameter can accommodate a ≤0.038" guidewire and 0.018" guidewire simultaneously. The introducer sheath contains TrueGlide™ hydrophilic coating to facilitate ease of placement. With the addition of the ACCEL® Access 3-Piece Introducer we have a full portfolio of percutaneous drainage products to handle your procedure needs from start to finish. Please visit our website and reach out to your local Medical Device Representative, or contact our Customer Support Team at 877-836-2228, to learn more about our complete portfolio of products. <http://bisusa.org/products/introducers/accel-access>
